Usbepower

Functional and inspired design

Usbepower transforms charging devices from simple accessories into innovative design objects. It's an approach that combines functionality and aestheticism.

Creating technology products requires a focus on details. Usbepower has become a name in sophisticated accessories with high speed charging technology. The company has developed cross-cutting knowledge and skills through its innovative design studio and R&D lab. With in-house conception design and production management, Usbepower creates objects that are beautiful, powerful and unique. Powered by its creative energy and drive to innovate.

Maker of design tech

Genuine manufacturer of chic objects that are technologically on-point, Usbepower combines design, industrial expertise and a keen eye for detail.

Inspired by a deep reflection on the role of technology in our lives, Usbepower creates iconic charging devices with clean and pragmatic design. Usbepower's sleek and minimal tech accessories seek to transform our relationship to our daily technology. Innovative and attractive, Usbepower products feature geometric forms, high quality materials, a range of rich colors and smart functionalities.
